## How can you improve your score?

- Make sure your RePEc profile is up-to-date. Log in at <https://authors.repec.org/> and click on "research".
- The search will only find works with author names that are among your name variations. Log in at <https://authors.repec.org/> and click on "names" to make sure that all relevant combinations are present.
- Do not remove older versions of your works from your profile. They may have been cited, or they may have been published in a series with a higher impact factor.
- Encourage your publishers or employers to participate in RePEc and have their publications listed.
- We do not automatically add citations for which we are not sure they are well classified. You can check and add what we have to propose: log in at <https://authors.repec.org/> and click on "citations".
